COVENANT FLEET BOX

The Covenant is a powerful theocracy that binds diverse alien species together through a singular religious vision. Their titanic warships hunt down humanity wherever it is found, and in this box you will find models and components that will allow players to either start a new **Halo: Fleet Battles** Covenant fleet, or expand an existing armada. This set includes two ORS Heavy Cruisers, two CCS Battlecruisers and sixteen SDV Heavy Corvettes. The merciless Imperial Admiral Xytan 'Jar Wattinree and cunning Minister of Etiology also enter the war, harnessing the zeal and technology of the Covenant as Fleet Commander and Heroic Character. If bought to start a new Covenant fleet, players will also need the Covenant Commander Box (**HFCV04**).
